We need to recycle - we can do it in style!

We at **Lundqvist Inredningar** have worked with storage for over 80 years and constantly strive to develop. The increasing demand for storage solutions for recycling gave us a new challenge, how do we create an efficient product for all waste that needs to be sorted?

This led to the collaboration with **Alpen Office** and the launch of **Waste**, which we believe fills the need for practical and stylish storage for several types of environments. The range has existed since 2008 and is annually redesigned and improved by Alpen Office and Lundqvist Inredningar, a successful collaboration that continues to this day.

We now present the updated series with tips for optimal recycling storage. The development is constantly moving forward, for easier and nicer recycling!

Lundqvist[™]
INREDNINGAR

Storage solutions designed and produced in Sweden since 1939

Phone: 08-632 98 00 • Web page: www.lundqvist.com
E-mail: info@lundqvistinredningar.se • Instagram: [lundqvistinredningar](https://www.instagram.com/lundqvistinredningar)

Our story

In 1939, Lundqvist Inredningar saw the light of day, the journey began with the innovative carpenter Harald Lundqvist. The vision was to create simple and functional storage solutions for both home and business.

In 1952, the carpentry shop is established in Gnesta for the manufacture of the Lundia shelf. The factory remains in our possession for the production of the Lundia Trä series.

During the 1940s, the bookshelf series Klassika was constructed - the first series-produced bookshelf for private individuals and offices. Klassika is still in the range today and is just as appreciated today as then.

During the '90s, recycling became more important for companies and it required an easy storage solution. Lundqvist Inredningar introduced the furniture series Aktiva with an associated environmental station. A piece of furniture that could hide recycling containers and made recycling in the office easier.

In 1989, Lundqvist Inredningar expands outside Sweden's borders and opens an office in Norway.

Nine years after the start, the company receives a patent for Lundiahyllan, Lundia Trä. The construction is based on brackets at the ends of the shelves and the functional self-tensioning principle. Success is immediate!

In 2000, Aktiva changed its name to A4+ and the name is still used today. The product has developed and is now available in several models for storage and as a module for recycling.

In 2003, Lundqvist's operations were acquired by our current owners, Christian Gustafsson, and Henrik Due. Together, they rebuilt Lundqvist's organization and today the company is more innovative than ever!

In 2008, our collaboration with product designer Tim Alpen started. Together we introduced the latest within recycling - Waste. The series included models such as Cut, Box, and Hungry and showed that sorting furniture can be both practical and stylish.

Since the launch of Waste, the range has expanded to several different models. Including Fold, Loft, and Unit. The series is constantly evolving, and our ambition is to have a well-thought-out source sorting solution for all conceivable environments.

2005 was a major milestone when Rosendal's furniture in Småland's Rydaholm was acquired. The factory is today called lab Inredningar and in addition to producing most of our product series, lab also has its own sales organization that sells and produces permanent furnishings in school, care and nursing.

In 2018, Lundqvist was commissioned to create a specially designed recycling solution for the Royal Institute of Technology. The solution was several recycling modules with custom lids. An exciting project that was very appreciated.

Today, Lundqvist Inredningar will continue to produce high-quality furniture and Harald's legacy lives on with the same vision. Simple and functional storage solutions that fit just as well in the office as at home.

Is recycling important?

Recycling is something that belongs to most people's everyday life and the benefits are many, for example, it contributes to reduced environmental impact and energy consumption.

According to the UN's global goals, we need to significantly reduce the amount of waste by 2030. We must therefore become even better at **reusing** our waste. Many people already recycle at home, but what does it look like in our workplaces where we spend most of our time? Companies and public premises produce waste daily that needs to be taken care of, and the bins are not always distinct or particularly attractive.

Lundqvist Inredningar has developed storage solutions that make recycling easier and more stylish. Our ambition is to get more companies to become better at sorting their waste. **Because today we know that recycling and the pursuit of a sustainable environment are more important than ever!**

Photo: Jack Church

2 billion tons

of waste was produced worldwide in 2016

Only 38%

of Europe's waste is recycled annually

By the year 2050

the amount of garbage is expected to have doubled*

Photo: Jasmin Sessler

The waste generated in our offices and workplaces can contain valuable substances and raw materials. But there may also be substances that are harmful to humans and the environment. By dividing what is to be recycled and what is to be incinerated, the raw material is extracted and saves the earth's resources. Sorting correctly also means that waste containing harmful substances is disposed of in the right way to protect our surroundings.

When we recycle, much of our waste can be made into new products. By doing this, we save valuable energy and our natural resources!*

*Source: the European Parliament, The Swedish Society for Nature Conservation

What happens to the waste?

Offices and other workplaces daily create waste that requires sorting. From delivery in cardboard boxes to the plastic box from today's lunch. Good sorting provides greater opportunities to reuse the materials and starts at the workplace.

Recycling at the workplace

We at Lundqvist Inredningar know that recycling is often a storage problem. Awkward bins that take up space and are not always so attractive are a common sight in many workplaces. We believe that a functional and inviting design can facilitate and encourage people to get better at recycling. Visible garbage bins are used more, stylish storage solutions are therefore welcome to stand in front and become part of the decor. And with easily accessible recycling, the chance of the staff sorting their waste also increases.

This resulted in the Waste series, whose focus is a function on the minimal surface and sharp design. The furniture is designed for different environments and can often be adapted to the needs of the workplace.

Placement

Some companies may have their recycling in the basement or somewhere secluded. This does not facilitate the actual sorting for the employees, and it takes up more time. We recommend instead having your recycling near the workplace's kitchen or kitchenette. Here the employees often gather, it is also in kitchen environments that a lot of waste is made. With recycling that takes up less space and is attractive, it can stand out and be accessible to everyone without affecting well-being. Now you no longer have to go down to the basement where the bins are often located, and thus save time.

Transparency

It should be easy to know what to throw where. Feel free to use color and text on the bins as facilitates sorting. We at Lundqvist Inredningar have developed practical decals adapted to our furniture. We also offer decals according to the Nordic standard. In addition to decals, a clear sorting guide is recommended that explains what is to be sorted and where. Attach the guide near the vessels or have it available digitally and make it easier for the staff.

Transportation

Now that everything is sorted, it will be shipped on. Today, several waste disposal companies work with environmentally friendly shipping of recycled waste. Feel free to arrange the collection so that the transport company can coordinate more fractions at the same time, this reduces the number of possible emissions. The number of pick-ups is governed by the amount of waste that is generated and the amount of staff there are in the workplace.

To keep in mind when planning to recycle at the workplace

Environmental descriptions

Lundqvist Inredningar are specialists in storage for all environments. Whether it is for the office, mall or gym, our furniture fits. Do you want to know which furniture is suitable for a certain type of environment? Read more in the table to the right.

 **Schools**
An environment that often requires durable furniture with the possibility of floor and wall mounting. Here you need a piece of furniture that can withstand a little tougher grip, for example, Loft which is powder coated and can be mounted to the floor.

 **Shopping malls**
Here, furniture with more fractions is recommended for increased sorting. The material should also be adapted for frequent use, such as the sheet metal barrels Honey and Arch.

 **Hospital**
In health care, furniture that can be sprayed without sacrificing quality or durability is needed. Examples of furniture that are adapted to these environments are Solid and Edge in laminate.

 **Offices**
In an office environment, our entire range applies. Both lacquered and laminated furniture. Adjust the amount of storage according to the number of employees and needs.

 **Outdoors**
This requires components and varnishes adapted for outdoor use. The furniture must withstand weather and wind and be mounted firmly in the ground or on a pole.

 **Restaurants**
Large modules adapted for a lot of waste are preferable in a restaurant. They must also withstand high wear, materials such as laminate, composite, or the like are preferred.

 **Kitchenette**
Smaller units with room for more fractions, for example for food waste, often fit here. Modules with less users are also exposed to less wear. It is, therefore, possible to have lacquered wood products.

 **Canteen**
For areas with a lot of people and frequent use, larger units are suitable, preferably with room for several fractions. Larger bins or garbage bags are preferable and a material that can withstand a little more wear, for example, Box, Solid or Unit in laminate.

 **Library**
Here, several, smaller units are recommended that can be placed around the room for increased accessibility. Most of our furniture fits into a library environment as there is often less wear and tear there.

 **Gym**
The size of the room usually determines which furniture fits best. Often smaller units scattered throughout the room are a good fit. These should withstand cleaning products and be easy to clean, such as Fold and Honey.

 **Sports arena**
In large areas, we recommend garbage bag units with more fractions for extended sorting. The material should also be adapted for frequent use, such as the steel metal barrels Drop and Fold.

 **Stores**
Place smaller units in the room depending on size. Honey and Fold are furniture that is suitable for a store environment.

 **Waiting room**
Often smaller premises where not much waste is formed. Here, smaller single sorts that can handle cleanings, such as Honey and Fold, are suitable.

HONEY

Honey

Honey is perfect for those who appreciate both design and function. Made of durable sheet metal, Honey can handle most things in tougher environments. With its practical hexagon shape, it is possible to place several modules closely in groups, perfect for smaller rooms and as interior detail. Choose from three different heights to adapt to your needs. The lid is delivered in MDF or sheet metal, with various fraction holes that facilitate sorting. For more clarity, it is also possible to add our stickers or sheet metal signs with laser-cut text, for easier recycling!

Facts

Material: Container in 1 mm sheet metal, lid in 2 mm sheet metal, or 19 mm MDF in standard white. Powder coating applies to sheet metal lids and containers, lacquers in any colour for lids in MDF

Container volume: Large 72 l, Medium 57 l, Small 43 l

Bag size: 125 l

Gap size: 150 x 170 mm (standard lid), available in other variants

Protection tray is available as an option

Adjustable feet are standard

Wheels are available as an option

Labels: Cut-out decal in vinyl plastic and adhesive decal according to Nordic standards

For more information about environments, see pages 13-14

FOLD

Fold

A playful shape that makes recycling good-looking! Fold is made of sheet metal and fits in environments where the requirement for durability is significant, without compromising on design. The lid's unique design is both stylish and obscures the rubbish for neater storage. The modules can be combined with different lids, preferably in groups to create an exciting element in the office, gym, or the local sports arena.

Facts

Material: 1 mm sheet metal in standard white powder coat
Available in any colour
Container volume: 72 l
Bag size: 125 l
Gap size: 540 x 143 mm (standard lid), available in other variants
Protection tray is available as an option

ARCH

Arch

Arch can be described as practical but is so much more! Designed to be used frequently and handle large volumes, it fits in crowded environments. The stylish design makes Arch stand out from ordinary, and often dull, recycling modules.

Made of sheet metal, it is both robust and easy to clean. Arch is also available in an outdoor version with thicker sheet metal and more durable varnish. The different sorting bins make it easier to recycle and with three garbage bags, there is room for lots of rubbish. Arch fits perfectly in larger areas such as malls, in the middle of the room, or in a walkway. The adjustable feet are standard, but for a more airy impression, you can add the pillar stand. Opens from the side to avoid heavy lifting.

Facts

Material: 2 mm sheet metal in standard white powder coat
Available in other colours
Variants: For indoor and outdoor use
Container volume: 210 l (3 x 70 l)
Bag size: 125 l
Gap size: 550 x 160 mm
Adjustable feet are standard for floor module
Floor mounting is available for variants on pillar stand
Labels: Cut-out decal in vinyl plastic and adhesive decal according to Nordic standards

LOFT

Loft

With its simple but self-evident design, Loft easily blends into its surroundings and fits in most rooms! Loft has a double throw-in and can be placed in the middle of the room or corridor for easy access. Choose standard white or stand out with an accent color that elevates the interior. Loft is also available in an outdoor version with more durable varnish, perfect for harsher environments. Can be supplemented with a protection tray and can also be floor-mounted for more stable storage. Opens from the side to avoid heavy lifting.

DROP

Drop

Tough, durable, and made of heavy-duty sheet metal. Drop is a practically designed container that can be combined with up to four different fractions adapted to high demands and frequent use. With room for more fractions, sorting becomes easier and you can add cover lids to hide the rubbish. Drop can be attached to the wall or on a floor stand, which makes it useful in many different environments where sorting should be easy!

Facts

Material: 1,5 mm sheet metal in standard white powder coat
Available in other colours

EDGE

Edge

Wood meets steel

Edge is a piece of flexible storage furniture where you can sort different waste in the same piece of furniture. With its practical sheet metal top, it is easily cleaned when needed. The wooden frame gives a warm impression and in combination with sheet metal it is both stylish and modern. Choose functional wheels that facilitate ever-changing environments or leave it steady without. Edge is ergonomically designed with a pull-out bag holder to avoid heavy lifting.

Facts

Material: 16 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer.
Top in 3 mm sheet metal in any colour. The frame can be lacquered in any colour
Container volume: 80 l/throw.
Bag size: 125 l
Gap size: 160 x 160 mm
Protection tray is available as an option
Handles: Standard push-open

UNIT

Unit

The perfect storage solution for the workplace!
Unit is a recycling module that fits into most environments. Place it against the wall or in the middle of the room and make recycling hard to miss. Unit comes in three sizes and has a pull-out holder for the garbage bag for easy care.
In addition to the standard version in white laminate, the module is available in veneer or lacquered in any colour. When lacquering, a stainless steel shoeing at the throw-in hole is also included. For extra clarity, we recommend our stickers with text and symbols on the doors, if the unit is lacquered, you can choose milled text. Unit is available in sizes: single, double, and triple, for smaller fractions, there is also a 3-drawer section for double and triple. Pull-out sack holder to avoid heavy lifting.

Facts

Material: 16 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer.
Available as lacquered in other colours
Container volume: 109 l per unit
Bag size: 125 l
Bin size: 19 l
Gap size: 160 x 376 mm
Protection tray is available as an option
Handles: No handles on door, push-open drawers
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic and adhesive decal according to Nordic standards
Equipment: Shoeing in 1 mm stainless steel is included with lacquered doors or is available as an option for laminate and veneer. Flip-lid in 1 mm stainless steel is available as an option

UNIT HIGH

Unit High

Sometimes you want elevated storage, so Unit High was developed, a complement to the lower version Unit. This storage solution is available with 4 or 6 drawers for 19-liter containers. Choose a pull-out drawer with a full or ventilated front, complete with an organic waste bin, and get a complete source sorting piece of furniture on a minimal surface!

Unit High has the same depth and height as its predecessor, Unit with a garbage bag, and can be placed next to each other for ultimate storage.

Facts

Material: 16 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer.
Container volume: Ventilated box, compost bin of 16 l.
Drawer with full front, bin of 19 l, alternatively two 10 l or 16 l compost bin. Full door, bin 19 l
Bin size: 10 l up to 19 l
Gap size: 276 x 140 mm
Handles: No handles on door, push-open drawers
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic and adhesive decal according to Nordic standards

UNIT LARGE

Unit Large

In need of extra storage? Unit Large is a larger module developed from the bestseller Unit. Unit Large is adapted for 140- or 190-liter roll containers but retains the same stylish design as the original. Unit Large is both durable and easy to clean. Also available as lacquered in any colour and can be supplemented with a flip-lid for the gap.

Facts

Material: 19 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer.
Available as lacquered in other colours
Container volume: Base modules available in 140 and 190 l
Bin size: 10 l up to 190 l. Cardboard trolley medium, garbage bag holder 125 l
Gap size: 582 x 200 mm
Door hanging: Left hung
Handles: Standard push-open

BOX

Box

With its discreet design, Box is one of the most customizable furniture of the Waste series. Available in sizes 140 and 190 liters and is made for frequent use. Let it blend into the interior or stand out with an exciting color. Box comes in several different basic modules, choose different designs for a practical combination that suits your purposes. The insert gaps in sheet metal are also available in standardized information colors, for easier and neater recycling.

Facts

Material: 19 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer. Available as lacquered in other colours. Inserts in 2 mm sheet metal in powder coating or stainless steel according to the equipment page.

Container volume: Base modules available in 140 and 190 l
Bin size: 10 l up to 190 l. Cardboard trolley medium, garbage bag holder 125 l
Gap size: 200 x 200 mm, 160 x 200 mm for double gaps
350 x 350 mm for large gap
Door hanging: Left hung
Handle: Standard profile handle 200 mm in white, black, or stainless steel
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic and adhesive decal according to Nordic standards

BOX MINI

Box Mini

Loved Box but needs less storage? Here comes Box Mini! With an equally practical design, but in a smaller format, the Box Mini is suitable for smaller workplaces and premises. Like the larger version, Box Mini's metal insert plates can have different colors than the module itself. Either as an informative color when sorting or as a stylish accent. The furniture comes in two different sizes, adapted for garbage bags or sorting bins, as well as a pull-out sack holder to avoid heavy lifting.

Facts

Material: 16 mm particle board in standard white direct laminate alt. oak, birch or white pigmented ash veneer. Available as lacquered in other colours. Inserts in 2 mm sheet metal in powder coating or stainless steel according to the equipment page.
Container volume: 72 l
Bag size: 125 l
Bin size: 60 l
Gap size: 150 x 200 mm
Door hanging: Left hung
Handle: Standard profile handle 40 mm in white, black, or stainless steel
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic, sheet metal, and adhesive decal according to Nordic standards

For more information about environments, see pages 13-14

HUNGRY

Hungry

Hungry is a storage piece that stands out! The rectangular gap gives great accessibility and hides the waste. Hungry's system consists of four basic modules and can be placed next to each other for the ultimate sorting solution. Drawer modules without inserts are intended for smaller recycling bins but can also be used for other content.

Facts

Material: 19 mm MDF in standard white lacquer. Available in other colours
Container volume: Base modules available in 140 and 190 l
Bin size: 10–190 l
Gap size: 582 x 162 mm
Door hanging: Left hung
Handle: Standard push-open
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic, sheet metal, and adhesive decal according to Nordic standards

HUNGRY MINI

Hungry Mini

Hungry Mini is, as the name reveals, a smaller variant of Hungry. The function is the same but in a flexible format for smaller rooms. Its pull-out bag holder facilitates handling, which makes the Hungry Mini an appreciated piece of furniture. Can be combined with the larger variant Hungry for a coherent sorting. Hungry Mini has a pull-out bag holder to avoid heavy lifting.

Facts

Material: 16 mm MDF in standard white lacquer. Available in other colours
Container volume: 50 l
Bag size: 125 l
Gap size: 318 x 104 mm
Protection tray is available as an option
Door hanging: Left hung
Handle: Standard grip handle milled in door
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic, sheet metal, and adhesive decal according to Nordic standards

SOLID

Solid

Design and function at its best! Solid is made of laminate and durable composite, perfect for slightly tougher environments that generate larger volumes of waste. Optimal for larger staff canteens or in school corridors. Solid has flexible inlet holes that separate the debris and makerecycling easier. It is available in 140- and 190-liter versions. Doors and drawers can be combined in different ways for the perfect storage solution.

Facts

Material: 19 mm particle board in standard white direct laminate, front in composite in crystal beige. Available in other colours or laminate
Bin size: 10–190 l
Gap size: 190 x 190 mm
Door hanging: Left hung
Handle: Standard push-open
Adjustable feet are standard
Labels: Cut-out decal in vinyl plastic, sheet metal, and adhesive decal according to Nordic standards

“With the Waste series, we have been able to create products that bring something good.”

Lundqvist Inredningar started early with recycling. It began with simple modules adapted for paper recycling but had to evolve to recycle more types of waste. This required a higher standard in material and design, and we saw potential in making recycling attractive and simple. This was the basic idea when Waste was launched in 2008 and which today continues to be developed according to customers’ views and needs.

“Thanks to Lundqvist Inredningar having its own production, we have worked closely together and developed the best in recycling. There is creative freedom where the process is quick from idea to finished product, which contributes to a fun and favorable result. Being able to work with Scandinavian materials such as wood and sheet metal feels great and from this, creates something new and exciting. The foundation is based on functionality, and the requirements for the materials are high but necessary to achieve a successful result. As a designer, you can always question what you do, but with the Waste series, we have created products that bring something good to help and inspire people to recycle!”
