

DROP

Drop

Tough, durable, and made of heavy-duty sheet metal.

Drop is a practically designed container that can be combined with up to four different fractions adapted to high demands and frequent use. With room for more fractions, sorting becomes easier and you can add cover lids to hide the rubbish. Drop can be attached to the wall or on a floor stand, which makes it useful in many different environments where sorting should be easy!

Facts

Material: 1,5 mm sheet metal in standard white powder coat

Available in other colours

Variants: Available with 1-4 fractions
