

EDGE

Edge

Wood meets steel!

Edge is a piece of flexible storage furniture where you can sort different waste in the same piece of furniture. With its practical sheet metal top, it is easily cleaned when needed. The wooden frame gives a warm impression and in combination with sheet metal it is both stylish and modern.

Choose functional wheels that facilitate ever-changing environments or leave it steady without.

Edge is ergonomically designed with a pull-out bag holder to avoid heavy lifting.
