# HONEY

Honey

Honey is perfect for those who appreciate both design and function. Made of durable sheet metal, Honey can handle most things in tougher environments. With its practical hexagon shape, it is possible to place several modules closely in groups, perfect for smaller rooms and as interior detail. Choose from three different heights to adapt to your needs. The lid is delivered in MDF or sheet metal, with various fraction holes that facilitate sorting. For more clarity, it is also possible to add our stickers or sheet metal signs with laser-cut text, for easier recycling!
